Datum: 21.05.2014

Cost Estimate for Medical Treatment

Name of the patient: Tkachova, Yelyzaveta
DOB: 17.05.2005

Medical diagnosis that causes treatment:

Relapse of Langerhans-histiocytosis, high risk group, diagnosed first in March 2013 with manifestations in the right tibia (instability) , spine and lungs

Leading senior physician: Prof. Wagner (Prof. Kontny)
Medical specialty: Paediatric Oncology

Anticipated treatment plan and procedures:

Clinical examination, laboratory tests, MRI of the tibia and spine, X.ray of the lungs.
Inductions chemotherapy over three months. Restaging.
Maintenance therapy may be performed at home

Expected length of in-patient treatment: 30 days
Expected length of out-patient treatment: 60 days

Estimated Costs of medical treatment

Including induction chemotherapy

| | | |
|--|---------------|----------|
| Hospital Treatment ca. | 30.000 | € |
| Costs of management | 340 | € |
| Large size single room charge 118 € / day, including accommodation of an escort person, if available | 3.500 | € |
| Senior physicians' fees ca. | 16.160 | € |
| Risk deposit | 10.000 | € |
| Total amount | 60.000 | € |

The cost estimate is done under the condition that the diagnosis can be confirmed and that the course of treatment is normal. If severe complications occur, especially if intensive care of surgery is necessary or if the inpatient treatment exceeds 50 days, the costs of hospital treatment can be markedly higher.

**The amount of 60.000 € has to be prepaid before the first admission.
(ATTENTION: The University Hospital Aachen does not accept credit cards.)**

The UKA will invoice only the really produced medical services according to the course of treatment. The rendering of accounts correspond the German-DRG-System and The German Medical Fee Index. Unspent money of advance payment will be refunded as soon as the final invoice is ready.

Accommodation of concomitant family members for low prices is possible in the UKA's guest house or in the Ronald-McDonald-Haus across the street (especially for the family of ill children).

If the patient's parents do not speak English or German, the encompassing of a translating person is necessary.

The University Hospital Aachen does not care for the patients' transfers and accommodation during outpatient treatment.
